

We get asked the question regularly from our customers: "WHERE DOES RED ROCK RWS RESPONSIBILITY END ON MY METER ASSEMBLY AND WHERE DOES MY RESPONSIBILITY BEGIN"?

This image of a meter assembly is labeled with part descriptions. Everything before (or to the left) of the solid red line is the responsibility of RRRWS which includes starting from the bottom up: incoming pipe, pack joint, ball valve, wye strainer, PRV - Pressure reducing valve, meter coupling, meter, endpoint, meter coupling & check valve. Everything after (or to the right) of the solid red line that connects to the customer's plumbing is the responsibility of the customer.
